

# **Llys Brenig Community Nature Space**

## **Drawing Description for the Blind**

The proposed Community Nature Space is in the field alongside Llys y Brenig between Ffordd Elan park and the shops. Access would be from Llys y Brenig next to the existing park gate and from the meadow behind the supermarket.

The perimeters of the field would be planted with new hedgerows and small areas of woodland would be created in both the north and south of the site; that is, next to the park and close to the roundabout.

The main part of the field would be a wildflower meadow with a central wetland area in the existing dips.

Circulation through the site would be catered for by both formal and informal pathways. Benches would be installed to allow visitors to sit and enjoy the Community Nature Space and possibly also an informal seating area. Throughout the site, some individual specimen tree standards would be planted.
